

## STOCK EPINEPHRINE ANAPHYLAXIS EMERGENCY PROCEDURE

If a student or faculty member presents with the following symptoms of Anaphylaxis:

MOUTH	itching, swelling of lips and/or tongue
THROAT*	itching, tightness/closure, hoarseness
SKIN	itching, hives, redness, swelling
GUT	vomiting, diarrhea, cramps
LUNG*	shortness of breath, cough, wheeze
HEART*	weak pulse, dizziness, passing out

*Only a few symptoms may be present. Severity of symptoms can change quickly.*

*\*Some symptoms can be life-threatening. ACT FAST!*

### **Emergency Action Steps** - DO NOT HESITATE TO GIVE EPINEPHRINE!

**1. Inject epinephrine in thigh:**

- Person weighing **less than 60 lbs.** – EpiPen Jr (0.15 mg) **or**
- Person weighing **more than 60 lbs.** – EpiPen (0.3 mg)

**To be administered by a trained faculty member.**

**EPINEPHRINE IS MAINTAINED IN THE MAIN OFFICES  
OF ALL THE BUILDINGS IN THE DISTRICT**

**2. Have office Call 911 or rescue squad**

- Call Emergency Contact
- Monitor Symptoms
- If symptoms are not resolving after 5 minutes administer second dose in the other leg
- Begin CPR as Needed

### **Post Emergency**

- Complete incident report
- School Staff involved in the medical emergency and the District Nurse will meet to debrief on the incident. The District Nurse will update the Medical Advisor on the medical emergency, and the outcome.
