ON-SITE COUNSELING CLINIC for ELEMENTARY and MIDDLE SCHOOL STUDENTS

September 2024

The School District of Greenfield is pleased to announce an important continued partnership with [Clinical Psychology Associates](#). CPA will have an onsite counseling clinic one day per week during the school day at for Greenfield students in grades K4-8th grade. All students in this age group will have access to the clinic which is housed at Greenfield High School: 4800 S 60th St, Greenfield, WI 53220.

Our district recognizes the importance of emotional well-being and the impact this can have on a student's educational experience. We also recognize that securing a local therapist can be challenging, and we would like to assist families in this regard. As an additional support to students, we have collaborated with licensed therapists at CPA to offer therapeutic services directly in the school setting.

If you feel your student is struggling with managing his/her emotions, anxiety, stress, or often seems as if in a depressed mood, consider taking advantage of this professional counseling opportunity. Therapy can provide your student tools to help navigate the challenges that can often occur during childhood.

Therapy appointments will be available during the school day, and parents will need to transport their child to the clinic in order to access these services. Payment for services will be via your family's health insurance plan or at an out of pocket rate.

*To ask any follow up questions or begin the intake process to start therapy, parents/guardians may contact Clinical Psychology Associates **by calling or texting 262-251-1112** or, emailing intakes.cpa@gmail.com to check insurance coverage and get started!*

MEET OUR THERAPIST- Monica Scheftgen, MS, LPC-IT

Monica Scheftgen, MS, LPC-IT

Monica Scheftgen is a Licensed Professional Counselor in Training (LPC-IT), and is the owner of Dandelion Counseling Services. When working with children, she utilizes play therapy techniques to allow them to work through that which they cannot verbalize. Due to the unique needs of each person, she also utilizes cognitive-behavioral therapy when it fits the needs of the client. Monica has experience working with the following populations and conditions: Children and adolescents, anxiety, ADHD, depression, life transitions, and trauma.
